NEW ERA SOCIETY FOR PROMOTION OF ACADEMICS, RESEARCH & KNOWLEDGE

one for all...all for one...

we at neSPARK

New Era Society for Promotion of Academics, Research and Knowledge (neSPARK), having its head quarter in New Delhi, is engaged in creation and propagation of opportunities in the regions where quality education and knowledge has not yet reached.

neSPARK's philosophy is to address the need of all age groups for both the sexes, so that each member of the society is adequately equipped to play a meaningful and effective role in building a balanced and developed society.

neSPARK's multi disciplinary Governing Body consists of renowned persons from the fields like judiciary, administration, defense, academics, medical, engineering, architecture science, finance, commerce, industry and media.

neSPARK intends to start chain of institutions in and around villages of India. Pilot project is starting from village Mahanad in District Hooghly of West Bengal in India.

'We as responsible citizens of India, not only owe it to our children but the society at large to provide them a comprehensive platform of academics and research based knowledge. We need to ensure that our children are well educated, well informed and well cultured to contribute for the prosperity and growth for a successful nation. It is towards this common goal that SPARK will work and establish itself as a dedicated school of knowledge for various fields backed by a dedicated group of people.'

- Prof. Amit Bose

Aims & Objectives:

- To enhance the quality of human resource of all age groups in the country.
- To create facilities at the place of their convenience for those who have been deprived of opportunities to get education and knowledge at the time of their growth.
- To provide high quality education to the students from rural and deprived areas.
- To create quality facilities for basic education, technical and para-medical education and knowledge at affordable cost.
- To provide facilities for vocational training to create skilled human resource.
- To have interaction with international community and institutions for exchange and value addition programmes.

Activities Envisaged:

To set up schools, colleges and institutions for providing education from pre-primary to higher level which will include all areas such as basic education, scientific education, management education, medical and para-medical education, including applied science, engineering/technical education which will eradicate illiteracy, create awareness among the people regarding their group responsibility and nationality, creating harmony amongst caste, religion and occupation in their day-to-day life by imparting basic socio-economic, technical and professional knowledge about various aspects of human development, and by providing opportunities for skill development.

To set up institutions as minority institution to extend the benefit of education, technical education, medical education and other education in emerging areas of technology to young boys and girls of minority class along with youth of other class.

To develop the modern education, adult education and formal education, to create awareness about different system of education and getting it implemented.

To organize Vocational Training Centres for traditional industry, modern industries and electronic industries in rural and urban areas, and training the children(boys & girls), men and women for welfare and prosperity.

To organize seminars and carry out research activities in all fields of education, including, but not confined to medical research, research for non-conventional energy, science, social science, engineering and technology for the welfare of nation as a whole and human being in particular.

To provide social education to eradicate the ill tradition of untouchability, dowry marriages, child marriages, bonded labour, other labour problems like child labour and rectify the ill systems/traditions prevailing in the society by spreading values of education, knowledge, co-operation, cohesiveness etc.

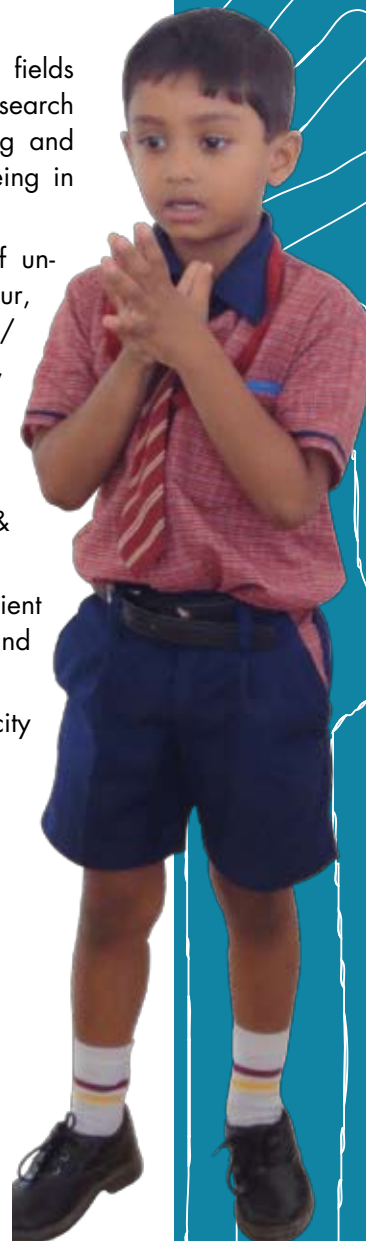

To spread knowledge and wisdom among people of all section of society who are deprived because of lack of facilities, opportunities and other socio economic causes through establishment of formal & informal academic, research and knowledge centers.

To educate people for building a disaster resilient society by organizing different academic, research and knowledge dissemination programmes.

To undertake research, consultancy and capacity building programmes and projects.
